ABOUT ME

Full Stack Developer with hands-on project experience building web applications using React, Next.js, TypeScript, and Node.js. Skilled in developing responsive user interfaces, reusable components, and design systems, as well as building RESTful APIs, integrating databases, and implementing secure authentication and session management. Familiar with modern UI libraries, Figma, and containerized development using Docker, with a focus on maintainable code and sound software engineering practices.

PROJECTS

ClashLens — Clash of Clans Analytics Platform

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express.js, Clash of Clans API, Linux, Vercel

Built a production-ready full-stack analytics platform that helps Clash of Clans players and clan leaders analyze clan performance, player progression, and real-time game statistics.

- **Developed** a full-stack web application using Next.js, TypeScript, Node.js, and Express.js with a secure backend API proxy for the official Clash of Clans API.
- **Designed** a reusable, type-safe architecture with modular components and service layers to improve maintainability and scalability.
- **Implemented** clan search, player profiles, hero and troop progression, donation statistics, and interactive data visualizations using live game data.
- **Deployed** the frontend on Vercel and the backend on a Linux VPS with a custom domain, following modern deployment and version control practices.
- **Optimized** application performance, accessibility, and responsive design, achieving a Lighthouse Performance score of **98+**.

SKILLS

Languages
JavaScript • TypeScript • Python • SQL

Frontend
React • Next.js • HTML5 • CSS3 • Tailwind CSS

Backend
Node.js • Express.js • REST APIs

Database & ORM
PostgreSQL • Prisma ORM • Drizzle ORM

Tools & Platforms
Git • GitHub • Linux • Vercel • pnpm • VS Code • Docker

Design
Figma • Responsive Design • Component-Based Design

EXPERIENCE

Software Development Intern
Intens Technology Ltd.
📅 Jan 2024 – May 2025

- Designed user interfaces in Figma for the Employee Management System and College Grievance System as part of the UI/UX team.
- Assisted in developing and integrating RESTful APIs using Spring Boot within a collaborative development team.

RPA Intern
Infosys & ICT Academy
📅 Dec 2024 – Mar 2025

- Developed Robotic Process Automation (RPA) workflows using UiPath to automate repetitive business processes, improving operational efficiency.

Web Development Intern
Glucian India Pvt. Ltd
📅 Jan 2023 – Mar 2023

- Built responsive web applications, including a to-do list and landing page, using HTML and CSS while strengthening frontend development skills.

Team Access Control API — Multi-Tenant Authorization System

Technologies: Node.js, TypeScript, Express.js, PostgreSQL, Prisma ORM, Redis, Docker, Zod, Jest, Supertest

- **Developed** a backend API for a multi-tenant system supporting organization-based access control and membership management.
- **Implemented** authentication and session-management functionality, with secure password hashing and access-control checks.
- **Designed** a relational data model for users, organizations, memberships, roles, and role-permission relationships using PostgreSQL and Prisma ORM.
- **Built** a permission-checking service that verifies organization membership, assigned roles, and granted permissions before authorizing access.
- **Configured** a Docker-based development environment with PostgreSQL and Redis, and developed automated tests to verify authorization behavior.
